NEWS RELEASE

CEPS, Inc. acquires Johnson Precision, Inc.

West Lebanon, NH, January 25, 2010 – CEPS, Inc., of West Lebanon, NH, a global provider of highly engineered plastic injection molded components and sub-assemblies, has acquired Johnson Precision Inc, (JPI) of Amherst, NH, one of New England’s leading full service and vertically integrated, custom mold manufacturing, machining and injection molding companies.

About CEPS

Formed in 1982 as an engineering focused firm, CEPS has evolved into a full service injection molder, offering design assistance, tool building, custom injection molding, and electronic and mechanical sub assembly services. CEPS is an ISO 9001:2000 certified, global supplier with 75 percent of its sales to the scientific laboratory and medical diagnostic equipment markets.

CEPS also serves original equipment manufacturers (OEM) and contract manufacturers in other industries including aerospace, electronics, defense, industrial and transportation.

About Johnson Precision

Formed in 1981 as a manufacturer of injection mold tooling, JPI is a full service design, custom mold manufacturing, machining and injection/insert molding company serving the life science, medical, and high-end electronic and specialty device markets. JPI is ISO 9001:2000 certified and serves a wide range of regional and national original equipment manufacturer (OEM) customers.

Jim Umland, CEO of CEPS said: *“These two companies are a perfect fit; our combined experience and complementary capabilities enable us to offer current and new customers a broader range of services, the benefits of scale and more globally competitive pricing and lead times.”*
